Virtual Reality Applications**

TEDx Constanța and Researchers' Night

UTBv team was present at TEDx Constanța 2017, an awesome event which was centered on life enhancing technologies. We have presented our latest works in the Innovation Booth, which was located just at the entrance of the event. Over 500 participants interacted with our team, sharing their ideas and discussing our cultural heritage VR applications. Valuable insight was gained not only from our visitors, but also from the hosts and from the speakers.

UTBv team also made a wonderful presentation at the end of September, at the high-school “Andrei Saguna” from Brașov, Romania, during the national event Researchers' Night. We have showcased our latest works: 2 museum-ready stands which will also be transported to the upcoming Brokerage event in Pisa, Italy, 2 Tango-enabled smartphones with cultural heritage AR applications and a haptic bow cabin, which featured both haptics and 3D content.
