eHeritage - Expanding the Research and Innovation Capacity in Cultural Heritage Virtual Reality Applications

Second workshop and the Brokerage Event

Our consortium has successfully hosted the second eHERITAGE Workshop and Awareness day held during the Internet Festival 2017. The discussions revolved over the main things we have accomplished so far, over the activities which we need to supervise and improve and over the upcoming exploratory meeting 3 and the conference from the next year.

A cornerstone foreseen in the evolution of our project was the brokerage event. As this was an event dedicated to important stakeholders, we have prepared for it for months in advance. Our purpose was to showcase different use cases of VR technologies for reconstructing, preserving, archiving and managing museum exhibits. Not only have we interacted with various interesting people, we also had the chance to talk about the upcoming conference which will the hosted by the eHERITAGE consortium in the end of May/beginning of June, 2018, in Brasov, Romania. Titled the "1st International Conference on VR Technologies in Cultural Heritage", it is our belief that this future event will bring together entities from a large social array, who wish to present and discuss the latest advances in this field of research.
