Preparing for the upcoming VRTCH'18 conference

Our team is taking the final steps for marketing the 1st International Conference on VR Technologies in Cultural Heritage (VRTCH'18). This event will take place in Brasov, Romania.

Preserving Cultural Heritage is a complex task that requires skills and techniques which need to be constantly upgraded. This 2-days event is thought not only as a classic conference, but also as a multi-level tutoring and a multidisciplinary collaboration opportunity for experts, librarians, researchers and all the other related stakeholders. In order to achieve common methodologies and best practices, during 29-30 May, 2018, we have the opportunity to come together, exchange ideas, experiences and know-how, and elevate research in Cultural Heritage and adjacent areas.

The scope of the VRTCH'18 is to:

- Disseminate the findings of new research
- Train participants in various fields related to preserving cultural heritage through VR technologies
- Offer an environment in which participants interact and exchange knowledge
- Make connections with experts and create new possible collaborations for the future
